

SCRLC 2010 Annual Membership Meeting

Organizational Resiliency

7 dangerous ideas to discuss in your organization:

What if.....

1. We stopped cataloging??
2. Librarians individually and as a profession promoted, used and helped develop Wikipedia?
3. We accepted open source software as a way of being in control of the customer experience?
4. We required all library staff to have expertise using technology?
5. Mistakes were expected and embraced-and librarians became the mistake masters?
6. We didn't make our customers work so hard?

Time to chat with your neighbors

1. Review the 7 dangerous ideas
2. What's the most uncomfortable? Why?
3. What are the opportunities in this dangerous idea?
4. Ideas for action?

Think the unthinkable:

1. What is an unthinkable thought?
2. Why is it uncomfortable?
3. Where are there opportunities in the unthinkable?
4. Actions??
