

## Dew Point Calculator worksheet

| temperature(°F) | %RH | dew point(°F) | PI <sub>(Preservation Index)</sub> |
|-----------------|-----|---------------|------------------------------------|
|                 |     |               |                                    |
| 65              | 35  |               |                                    |
| 70              | 40  |               |                                    |
| 72              | 40  |               |                                    |
| 75              | 30  |               |                                    |
| 75              | 40  |               |                                    |
| 75              | 60  |               |                                    |
| 78              | 35  |               |                                    |
| 68              | 45  |               |                                    |
| 50              | 30  |               |                                    |
